

Juan Manuel González

BUSINESS OPERATIONS / DATA & PROCESS ANALYSIS

956.693.1317 · juanglz197@gmail.com · Austin, TX · www.gonzalezjuanm.com

Business operations professional with 5+ years analyzing data, building tracking and reporting systems for cost, contracts, and project data, and translating complex requirements into documented processes. Experience spans construction operations and SaaS account management, including data structuring, process documentation, and workflow automation across 50+ active projects and 3,000+ client tasks. Skilled at communicating technical findings to non-technical stakeholders and keeping systems and records accurate as they scale.

01 PROFESSIONAL EXPERIENCE

JMG Systems LLC

AUSTIN, TX

Founder & Principal Consultant

APR 2025 TO PRESENT

Independent operations practice. Sole proprietorship from 2025, incorporated in Texas in 2026.

CLIENT PureSteel Construction Inc. · Commercial construction · Dallas, TX

- Built a custom operations system covering subcontractor onboarding, cost estimating, subcontract agreements, change orders, and job site time logging, with every form backed by a shared Google Sheets database so updates reflect automatically across the pipeline.
- Led data strategy for the system, defining field structures and running ongoing clean-up to keep subcontractor, client, and project records accurate and consistent.
- Layered n8n automation into the system to handle conditional approvals, automated reminders, and e-signature routing via DocuSeal, replacing manual email-and-spreadsheet follow-up.
- Built and maintain the purchase order and cost tracking records that give the client's leadership structured visibility into contract status, cash flow, and project cost estimates.
- Produced process documentation and instructional walkthroughs so the client's leadership and subcontractors could operate the systems without ongoing support.

SalesLabX

FULLY REMOTE · AUSTIN, TX

Senior Marketing Account Manager

APR 2021 TO APR 2025

- Analyzed campaign and pipeline data across client accounts, building reports that leadership used to evaluate performance and adjust strategy.
- Translated client requirements into documented project plans for 3,000+ projects, managing milestones and delivery timelines from kickoff through final delivery and reporting.
- Facilitated 2,400+ client and internal meetings, serving as the primary point of coordination between technical teams, leadership, and external stakeholders.
- Investigated and resolved system and data discrepancies, including conversion errors and integration issues, producing technical documentation to explain findings to non-technical audiences.
- Managed the design and rollout of multi-stage data capture forms and lifecycle programs, ensuring clean data flow between systems.

Marketing Account Manager Team Lead (concurrent role)

AUG 2022 TO JAN 2025

- Led a team of six Account and Project Managers, each carrying their own portfolio of 3 to 5 client accounts, and held responsibility for the quality and timeliness of their projects and the satisfaction of their clients.
- Acted as the senior escalation point for technical and relationship issues across 20+ active accounts, ensuring project momentum and client retention.
- Partnered with agency leadership to analyze trends across the book of business, implementing new SOPs to improve onboarding consistency and delivery speed.
- Provided guidance to junior team members on complex system workflows and data processes, reducing internal bottlenecks.
